Introduction

- Every organization = depends on information & information systems to carry out its mission/objectives
- Every organisation should
 - identify & assess risks to systems & information
 - reduce risks to acceptable level.
 - be aware of residual risks
- New previously unidentified threats = will appear
- Total protection = impossible
- Preparation = key
- Learning from past information security crisis & ways dealt with them = key

Crisis Management

 **ISACA**
Serving IT Governance Professionals
Belgium Chapter

Definitions: Crisis

BELGIUM : Royal Decree (KB 18/04/1998)

- **Crisis = an event that due to its nature or consequences**
 - Threatens the vital interests of the country or the essential needs of its population
 - Requires an urgent decision
 - Requires a coordinated approach and resources from different departments & organisations
- **In reality crisis situations are situations in which the social order, the democratic institutions, the security or the public order are endangered by disruption of public order (high risk manifestations, terrorist threats,...). It can deal also with disasters, catastrophes or emergencies from a natural or industrial nature.**

 **ISACA**
Serving IT Governance Professionals
Belgium Chapter

Definitions: Crisis

- **Crisis management = a discipline within the broader context of management.**
- **3 common crisis management elements:**
 - (a) a threat to the organization,
 - (b) the element of surprise,
 - (c) a short decision time.
- **The practice of crisis management involves attempts to eliminate technological failure + developing formal communication systems to avoid or to manage crisis situations**
- **Crisis management does not represent a failure of Risk Management, since it will never be possible to totally mitigate the chances of catastrophes occurring.**
- **Crisis is also a facet of risk management**  DELIVERING VALUE

Crisis Management

Crisis Management Programme : Preparation

PREPARATION

- Key consideration
- One of first tasks = develop definition of term “crisis” => clear scope
- When crisis happens = too late to begin planning response.
- Organization’s ability to react swiftly & effectively to crisis = *managed* process.
