# Hacking the Human Case Study

Colin Greenlees

Responsable Sécurité du Système d'Information

**Eurostar International Ltd** 

## Social Engineering

#### What is social engineering?

Social engineering is best described as the acquisition of sensitive information or inappropriate access privileges by an outsider, based upon the building of an inappropriate trust relationship with insiders.

## Case Study

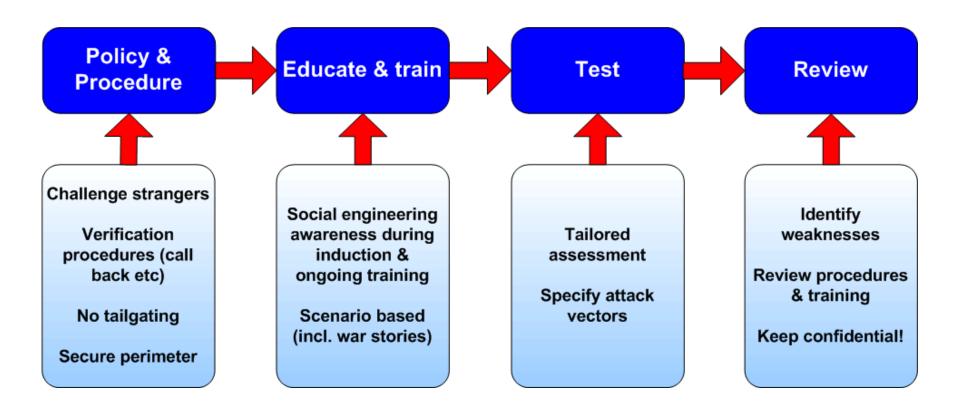

#### The financial services organisation

- Physical & telephone attack
- 5 day infiltration
  - 1. Highly confidential material 'stolen'
  - 2. Access to <u>all</u> company documents (finance, HR etc)
  - 3. Server room compromised
  - 4. PA's targeted
  - 5. Security team compromised

## Reducing the risk

"You can have the best firewalls, encryption tools and such in place, but they will neither detect nor protect you from a social engineering attack."

**Kevin Mitnick**
